Continuation of Disposition of Claims: Claims **withdrawn** from consideration are 1,3-8,10-12,17,19,20,22-30,33-38,41-43,45-48 and 52-58.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 15, 51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, as originally filed, fails to broadly disclose that the second member secures one of the fibers and the first member secures the other fiber. The specification only provides support for the second member securing the collection fiber and the first member securing the delivery fiber.

***Response to Arguments***

Applicant's arguments filed August 19, 2010 have been fully considered but they are not persuasive. Applicant states that original claim 1 provides support for the claim limitations set forth in claim 51. The Examiner disagrees, claim 1, as originally filed, fails to include the first and second members with the second member enclosing the first member and where the members secure the fibers. Applicant then refers to paragraph 0045 as support for the claim limitation. It should be noted that the specification filed with the current application fails to include paragraph numbers. Furthermore, the specification fails to disclose, with respect to the elected species, that the second member secures one of the fibers and the first member secures the other fiber. The specification only provides support for the second member securing the collection fiber and the first member securing the delivery fiber. Claim 51 is directed to the elected embodiment of figures 5a-b and not figures 6a-d. Therefore claim 57 is not considered because it includes features not disclosed to be part of the elected embodiment.

**Conclusion**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
